

**TBSA SUMMER  
HOCKEY CAMP**

**CAMP SKILLS**

To become a capable and beneficial team player, you will have to learn and master several skills. Skating and stickhandling skills will be the focus of this camp. Mastery of these two basic components of hockey will make you a valuable player on any team.

Conditioning is as important to hockey as the puck. This camp will feature a multitude of conditioning drills that will help the player perform at 100% even in the waning moments of the third period, when the team really needs them. In addition to added performance, the conditioning drills will improve a player's speed and agility!

We at TBSA hope that you decide to come to camp motivated. This experience will be intense from a beginner's perspective; however, it will improve the skills that are demanded in Youth League Play.
